

Winter nature activities

Bucket List

Try to check off as many as you can!

- Learn how to [track wildlife in the snow](#).
- Build a fort
- Go on a [scavenger hunt](#)
- Take part in NCC's [Small Acts of Conservation](#) and [Nature Coach](#) programs.
- Catch a snowflake on your tongue
- Explore on snowshoes
- Toboggan
- Play the game [Fox and Goose](#) (winter outdoor tag).
- Visit your local and provincial park website to find out about winter adventure opportunities in your area.
- Blow bubbles! The bubbles freeze, making an incredible opportunity for pictures. The bubbles eventually pop, and they look like they are melting, due to the glycerin in the solution. To prepare, mix 1 cup warm water (distilled does work best), 2 tbsp Dawn dish soap, 1 tsp glycerin, and 1 tsp sugar.
- Hang a bird feeder in your yard and join [Project Feederwatch](#).
- Go skating
- Make a snow angel
- Go for a night walk in the snow and feel the stillness in the air and listen to the crunch under your feet.
- Go skiing (cross country or downhill)
- Go ice fishing
- [Look for animal tracks](#)
- Build a snow person
- Take some winter nature photos – try perspective photos. Take pictures from underneath a tree or plant to see how the sky looks from their perspective.
